PROFESSIONAL SUMMARY

Backend-focused Software Engineer with hands-on experience building and optimizing REST APIs for a live production platform in Java and Spring Boot. Skilled in database design and migrations, and scalable backend architecture. Delivers backend features on deadline while collaborating directly on production deployments.

SKILLS

Languages: Java, JavaScript, Python

Backend & Frameworks: Spring Boot, REST APIs, Node.js, Express.js

Web: React.js, HTML, CSS

Databases: PostgreSQL, MySQL, MongoDB, SQL

Cloud & Tools: AWS (EC2, S3, IAM, VPC), Git, GitHub, IntelliJ IDEA, VS Code, Postman

WORK EXPERIENCE

Software Intern — Ipsator

Aug 2025 – Aug 2026

- Engineered backend features in **Java** and **Spring Boot** for a live ship booking and management platform powering **IRCTC Lakshadweep** ticketing operations.
- Designed and optimized **REST APIs**, improving backend response performance under real production traffic.
- Executed **database migrations** that improved API efficiency and reduced data retrieval time.
- Delivered backend features on schedule while collaborating directly with the engineering team on **production deployments**.

Analyst Intern — London Academy For Applied Technology

Jul 2024 – Aug 2024

- Collaborated within a cross-functional development team on **module design** and implementation for live software projects.
- Improved **deadline management** and delivery coordination, helping the team ship on schedule.

PROJECTS

AllergyLens — AI-Powered Food Allergy & Nutrition Analysis Platform ↗

- Architected an AI-powered food safety platform using **Spring Boot 4**, **Java 21**, **PostgreSQL**, and **Google Gemini AI**.
- Built **multi-image scanning**, allergy detection, nutrition analysis, health scoring, and an AI-powered food assistant.
- Designed scalable **REST APIs** backed by **PostgreSQL** and deployed the backend on **Render**.

E-commerce Backend System ↗

- Built a full-featured **e-commerce backend** in **Java** and **Spring Boot** with RESTful APIs spanning users, merchants, products, and orders.
- Integrated **order-processing workflows** using **Temporal**, covering order creation, payment tracking, and refund handling.
- Implemented **Redis**-based rate limiting, server-side pagination, and **circuit breaker** patterns for resilient API communication.

Movie Booking Application ↗

- Built a full-stack movie booking application using the **MERN stack** (MongoDB, Express.js, React.js, Node.js).
- Developed **real-time seat selection** to prevent double bookings and built an admin panel for managing movies.

EDUCATION

B.Tech, Computer Science and Engineering

Oct 2021 – Jun 2025

Babu Banarasi Das Engineering College, Lucknow

CERTIFICATIONS

- Technology Job Simulation — Deloitte Australia (Forage) ↗
- Generative AI — Microsoft (LinkedIn Learning) ↗
- Java Training — Udemy ↗
- Google Cloud Career Certificate ↗
- GitHub Foundations — GitHub ↗

ORGANIZATIONAL EXPERIENCE

Member — Google Developer Student Club (GDSC)

Sep 2022 – Jul 2025

- Organized and supported technical **workshops** and **hackathons**, strengthening real-world development skills through hands-on collaboration.
